

1st Vending

To Whom It May Concern:

1st Vending provides businesses in the Phoenix metropolitan area with exceptional service and state of the art machines for snacks and beverages.

Our sales team decided to investigate the possibility of using telemarketing to generate appointments and increase sales. I met with the representatives from Results Telemarketing in person and they worked with me closely to develop a targeted call list and script.

Their pricing for a small pilot project was very competitive and we talked on a regular basis once the campaign began.

We were happy with the outcome of the project, will be using their services again and would recommend Results Telemarketing to any company that has a need for qualified appointment scheduling.
